We present this beautiful exterior first floor which has 47m2 formed by the living room, first floor and kitchen.

We find a metal spiral staircase that communicates with the upper part in which we have a bedroom. Surface that is not computed in the meters of the house. This is presented furnished and with appliances. In addition, the street is very quiet and we will not worry about outside noise. Something very important is the location. It is attached to the street of Bravo Murillo, which has several supermarkets, stores, local stores, pharmacies, entertainment, and more. Not to mention that we have very good access to various public transport services

such as the Madrid metro or bus. A property that stands out for its quiet location and in turn, the proximity to all services and leisure. Can you imagine living here?
